The relationship between Freemasonry and Methodism is complex, with differing views and historical tensions, though many Methodists are Freemasons and vice versa. The Methodist Church has issued guidance advising caution due to theological concerns, such as the nature of the "Great Architect of the Universe" and the perception of secrecy, although it leaves the final decision to individual conscience. Historically, there were also rifts, such as the 1858-1860 schism that led to the formation of the Free Methodist Church.

Methodist perspective

- **Official guidance**: The Methodist Church in Britain published a report in 1985 advising caution about Freemasonry.
- **Concerns**: The report highlighted concerns about Freemasonry's rituals, secrecy, and its concept of God as potentially being a form of syncretism that could conflict with Christian beliefs.
- **Individual conscience**: Despite the concerns, the church's guidance did not impose a binding rule, stating that membership was a matter of individual conscience.

Historical context

- **Schism**: Freemasonry was one of the issues that contributed to a schism in the Methodist Episcopal Church in the mid-19th century, which eventually led to the

The relationship between Freemasonry and Latter-day Saints is complex, with historical connections and periods of both tension and cooperation. **The two groups are not officially connected, but LDS Church founder Joseph Smith was a Freemason, and many modern LDS members are also Freemasons**. The similarities between their rituals are often discussed, though their purposes are distinct: Freemasonry focuses on moral self-improvement, while LDS temple rituals are about spiritual preparation to return to God.

Historical connection

- Joseph Smith was initiated as a Freemason in 1842, and his father and brother were also Masons.
- Early members of the LDS Church were also Freemasons.
- Periods of tension arose, such as when Joseph and Hyrum Smith were murdered, with some Masons in the mob contributing to the tragedy.
- The relationship was historically strained in some areas, such as Utah, but has improved considerably.

Modern-day relationship

- The LDS Church and Freemasonry are separate entities, but members can belong to both.

Freemasonry and Mormonism have a historical connection, with Joseph Smith and many early Mormon leaders being members of Masonic lodges. The Latter-day Saint temple endowment ceremony shares structural and symbolic similarities with Masonic rituals, which some early Latter-day Saints viewed as a shared "common ancestry". The two traditions have different purposes: Freemasonry is a fraternal organization focused on personal development, while Mormonism is a religion focused on its unique theological path to salvation.

Historical connection

- **Joseph Smith:** Was a Mason for a short time before his death in 1844 and introduced the Mormon temple endowment ceremony shortly after joining.
- **Early members:** Many of the first recipients of the endowment were also Masons.
- **Influence:** Joseph Smith borrowed elements from Masonic rituals, oaths, and symbols to create the endowment ceremony.
- **Perspectives:** Some members believe the similarities indicate a common, ancient origin, while others believe it shows that Joseph Smith was influenced by Masonic practices.

Key differences

- **Purpose:** Freemasonry aims to make "good men better" through moral and fraternal

The Catholic Church forbids membership in Freemasonry, citing that its principles are irreconcilable with Catholic doctrine. The Church prohibits Catholics from joining Masonic lodges, stating that those who do are in a state of grave sin and may not receive Holy Communion. While many Catholics are confused by this stance and view Freemasonry as a harmless fraternal organization, the Church's position is based on the belief that Freemasonry promotes religious indifferentism and has secretive, anti-Catholic elements.

Kabbalah is a Jewish mystical tradition, and some of its concepts and symbols have been incorporated into some branches of Freemasonry, which uses symbolism for moral and spiritual development. While they are distinct traditions, some interpretations see shared themes, particularly in how Kabbalah's Tree of Life can be seen in Masonic symbolism, representing a path to spiritual enlightenment. The connection is not a strict one-to-one relationship, as Freemasonry has its own distinct set of symbolism and influences.

While police forces have historically dealt with concerns about Freemason membership, the relationship is complex and has changed over time, with modern police forces focusing on transparency and declarations of potential conflicts of interest. In the past, there were instances where Freemasonry was linked to corruption within police forces, but these events have led to reforms. Today, though membership isn't banned and may not be officially registered, many forces now require officers to declare associations that could pose a conflict of interest, such as the Metropolitan Police in the UK.

The Order of the Eastern Star (OES) is **a fraternal organization affiliated with Freemasonry, but it is separate from it**. Founded by Freemason Dr. Rob Morris in 1850, its purpose is to provide a charitable and social organization for both women and men, while also emphasizing moral teachings and community service.

- **Relationship to Freemasonry:** The OES is considered a "concordant body" of Freemasonry, and its members are typically Master Masons themselves or close female relatives of Masons (such as wives, mothers, sisters, daughters, or widows). While they share principles, OES is not the same as Freemasonry and has its own rituals and ceremonies.

Freemasonry in Israel is a diverse organization with **approximately 15,000 members across 50 lodges**, reflecting the country's multicultural population. The Grand Lodge of the State of Israel, established in 1953, governs lodges that operate in nine languages, including Hebrew, Arabic, English, and French. Its lodges are involved in charitable work and serve as a point of integration for immigrants, and while traditionally men-only, recent discussions have proposed allowing women to join.

AI Overview

The terms "Freemasonry" and "UN" are linked in some conspiracy theories about a "New World Order," but there is no official relationship between the two organizations. While some Masonic groups have a formal association with the UN's Department of Global Communications as part of its Civil Society partnerships, this is not a unified or central affiliation of all Freemasons. Other less direct connections include the naming similarity between the United Nations affiliated entity, "Temple of Understanding," and Freemasonry, and the fact that both are organizations with a global presence.

Conspiracy theories and alleged connections

- **New World Order:** Some conspiracy theories posit that Freemasonry and the UN are secretly working together to establish a single, centralized world government.
- **Global control:** Another theory suggests that a hidden, worldwide governing body within Freemasonry controls various positions of power, including in the government and other organizations, in a unified manner.
- **Temple of Understanding:** The existence of the Temple of Understanding (a UN-affiliated organization) has been used as "evidence" to suggest a connection between Freemasonry and the UN.

B'nai B'rith was **founded in 1843 as a Jewish service organization explicitly modeled after Freemasonry's lodges, but with the purpose of strengthening the Jewish community, assisting new immigrants, and combating antisemitism**. While Freemasonry is a separate fraternal order with a requirement to believe in a Supreme Being, it has historical connections to Judaism through its rituals and symbolism related to the Temple of King Solomon. The creation of B'nai B'rith was influenced by the Masonic template to provide a fraternal structure that responded to the specific needs of Jewish immigrants, who faced both assimilation pressures and discrimination.
